NEW FOR 2008

SAME INNOVATIVE DESIGN

GREAT NEW FEATURES

FAMILY & SPORT

Introducing the next generation of The Buddy Bike! In 2008 customers will have their choice between **Buddy Bike Family** and **Buddy Bike Sport**. Both models utilize quality parts and are based on the unique and innovative Buddy Bike design. They will feature aluminum frames and shorter overall bike length for a lighter ride and easier bike rack loading.

Buddy Bike Family (7 speed) will accommodate easy going riders with lower top tubes and a lower rear rider seat that will allow for easier mounting. Cycling enthusiasts who want to go farther and faster will enjoy **Buddy Bike Sport**. Sport has a wider range of gears for better climbing, a suspension fork, durable bi-pod kickstand and hybrid tires for a smoother ride with less rolling resistance.

Buddy Bike Family and **Buddy Bike Sport** will be available in 2008. Buddy Bike model BB101 is in stock and ready to ship now!

IN STOCK

"Is this much *fun* from a buddy bike normal or legal? The children and I seem to have *smiles* from ear to ear when we ride it."

Laurence - London, U.K.

I have a wonderful son, Kenny who has autism...Here is what he said to me tonight while riding our Buddy Bike: " I like riding our bike on our quiet streets when it is like this...Like when it's warm out, but if you ride the bike a little bit fast it makes the wind go by and be cool out too - right on your face." I knew exactly what he meant. It is what I have always loved about riding a bike. I love that the Buddy Bike is giving us these opportunities to be together, work together, play together, talk together and...that part about riding a little bit fast so that the wind goes by and makes it cool out - right on your face...it's the greatest.

The Buddy Bike is doing so much more for us than just getting us around town on a bike.

Maureen - Monroe, MI
